The name "čeština", Czech, is derived from a Slavic tribe of Czechs ("Čech", pl. "Češi") that inhabited Central Bohemia and united neighbouring Slavic tribes under the reign of the Přemyslid dynasty ("Přemyslovci"). It may be though derived from the word root čel- (with l changed to ch) that can be found in the word čeled', "family". Another possibility is that Čech is derived from the word česat/čechat meaning "comb" but also "beat". Then Čech would be "warrior". This is a demonstration of some of the advanced and special characters in this font. Typography is the art and technique of arranging type, type design, and modifying type glyphs. Type glyphs are created and modified using a variety of illustration techniques. The arrangement of type involves the selection of typefaces, point size, line length, leading (line spacing), adjusting the spaces between groups of letters (tracking) and adjusting the space between pairs of letters (kerning).
