Please Note:

If your design software does not have a glyph palette and you choose not use an outside character map (windows character map, Popchar, etc) then please install the various versions of Desire. The downside to this is you will loose the kerning (the spacing of the letters). You will have to manually kern the letters.

COOKING

The word COOKING has been typed out in Desire.

COØKING

The O has been replaced with Desire Uppercase 1. The kerning is not applied.

COØKING

The fix is to type:  
? before the O.  
The ? has been assigned the amount of kerning for the rounds. The ? mark needs to be typed while in Desire Uppercase 1. Each font has the space set at the question mark. Same with the lowercase.

CO?ØKING

■ Desire

■ Desire Uppercase 1

So anytime you have two rounds as in OO, OC, OG, DO etc.. this will fix the spacing.
