## Layered Fonts

Selected families in the collection include 'layer fonts' which are designed to used together to create exciting typographical possibilities:

For example Algor consist of Algor Regular, Algor VII and Algor IX. Algor Regular and Algor VII can be layered for a striking effect. Algor IX is transparent with more relaxed spacing which enables the observer to see right through it. Alternate letters with closed counters provide a world of design possibilities.

A background layer of Algor VII...

**Light Years**

**ALIEN**

Plus a layer of Algor Regular...

Light Years

Equals...

**Light Years**

Or use the hollow non-overlapping Algor IX
