

Mirella Script is a modern and clean approach of the classic French Bastarde script style. Mirella has the follow resources :

- Lots of ligature forms (using contextual alternates open-type feature),
- many stylistic alternates for each letter (upper- and lowercase and all accessed with the glyph palette), a set of 55 ornaments and fleurons accessed with the glyph palette or using the Ornaments feature);
- initial and final letters with artistic variations accessible using the initial and final form open-type features

- a tour-de-force kerning work: almost 700 glyphs in this font was adjusted to your kern pairs handly.

In non-OpenType-savvy applications it works well as an unusual and beautiful script style font. We ever suggest the use of the glyph palette to find ideal solutions to specific designs, because the high number of glyphs. The sample illustrations will give you an idea of the possibilities. You have full access to this amazing stuff using InDesign, Illustrator, QuarkXpress and similar software.

Mirella Script has original letters designed by Iza W and overall creative direction plus core programming by Paulo W.
