Spumante

A slim, semi-connected script with lithely upright curves, Spumante conveys the casual effervescence of its namesake wine. Smoothed brush-script letterforms bounce gently along the baseline, and letters vary slightly in their slant—characteristics that combine to create a very human and inviting mood.

This approachably attractive face transforms from understated femininity to cocktail-party chic in just a few clicks. Dress it up with over 200 swashes, alternates, and ornaments, or use the titling alternates (in the OpenType menu) for a minimalist, unconnected look.

Spumante is ideal for food packaging and menus, cosmetic labels, book covers, or greeting cards and invitations. 

OPEN TYPE FAQ:

For information on how to access the swashes and alternates,
visit LauraWorthingtonType.com/faqs

All operating systems come equipped with a utility that make it possible to access the swashes and alternates in my fonts. Adobe Illustrator and InDesign (CS versions), Quark Xpress 7.0 (and above), CorelDRAW X6 (and above) have OpenType and Glyph panels, You may download instructional PDFs on my FAQs page for these programs. Microsoft Word 2010 and later versions allow you to access some OpenType features in the application as well.

There are additional ways to access alternates/swashes if you do not have one of the programs listed above: either by using your operating system's utility Character Map (Windows), Character Viewer (Mac OS versions prior to 10.9) or through Font Book (Mac OS 10.9 and later), by downloading NexusFont (free, Windows only) or by purchasing a software program such as PopChar or Ultra Character Map.

I recommend trying out Character Map/Viewer or Nexus-Font first to see how it works for you before purchasing third party software. If you don't like how these utilities work, here are some additional solutions...

For Mac users running OS 10.8 and above is Ultra Character Map which may be downloaded on the App Store for \$9.99

For both Mac and PC, I also recommend PopChar by Ergonis (especially operating systems prior to 10.8), which is a standalone glyphs panel. It makes it easy to select and copy the swash or alternate letterform you want and paste it into just about any document/program (Photoshop, Word, Publisher, etc.) If you have, or are planning to purchase one of my fonts, contact me with a copy of your receipt for a 30% discount code on PopChar.

Hello

Greetings
and
Salutations

 MIRRORED
VERSION

HOW TO USE SPUMANTE SHADOW:

There are two versions of Spumante Shadow. One version has the shadow built in (Spumante Regular plus Shadow) and a version that is the shadow by itself (Spumante Shadow) which accompanies Spumante Regular. The use of Spumante Regular with Spumante Shadow added as a separate file, which allows you to apply different colors to Spumante and the shadow, is limited to use in applications that support layers, such as Adobe Illustrator, InDesign, Photoshop and CoreIDRAW.

1. To use Spumante Regular + Spumante Shadow together, type your text with Spumante Regular on the first layer.

Spumante Shadow

2. Next, duplicate the layer, select the text and change it to Spumante Shadow. Nudge the shadow layer to the right and down to your liking.

Spumante Shadow
