aboutparachute®

THE COOL, THE CLASSIC, THE ORIGINAL. Parachute® landed in 1999, but it wasn't till 2001 that it started operating as a full-scale type foundry. By then several designers had joined in to form a select group of open-minded, free-spirited indivinduals/friends. Graphic designers, illustrators, educators, typographers, with fresh ideas and a strong desire to design sophisticated typefaces which reflect current cultures and trends. Parachute® is based in Athens and is the major font supplier to most publishing houses and advertising agencies in Greece. It has built a strong network of valuable relationships with customers in Europe, United States, Canada and Australia, by providing custom font services and corporate font licensing. It's clientelle includes multinational companies such as Ikea, Vodafone, Nestle and Unilever, advertising agencies such as DDB, Leo Burnett, McCann Erickson, BBDO, Saatchi & Saatchi, Lowe, TBWA, Spot Thompson, publications such as National Geographic, Playboy, FHM, Elle, Vogue, Harper's Bazaar, Marie Claire, PC Magazine, Lucky, PC World, Votre Beauté and many, many others. In the last 5 years Parachute's designers (a.k.a. Parachuters) have won three major typeface design awards, while their work has been featured and extensively presented in design-oriented magazines. The year 2003 marked the beginning of a new era for Parachute® with the release of a major 200-page catalog, which contained Greek and Latin typeface specimens. This catalog/book included several classic revivals of historical importance, as well as many original font designs. Since then an emphasis was placed on multilingual support and OpenType® technology. In the spring of 2004 Parachute's first opentype "Pro" font was released. "Archive Pro" an award winning typeface with multilingual support (over 1.350 glyphs/font), kerning for all European languages as well as advanced typographic features, was first presented at the "Adobe Creative Days 2004" forum, which was held in Athens, Greece. From then on, all Parachute® fonts have been redesigned to offer multilingual support, which includes major scripts such as Latin, Greek and Cyrillic.

opentype®and parachute®fonts

OpenType® is a new font format developed jointly by Adobe and Microsoft. This technology is becoming the new world standard for font development. There are three major advantages over older formats such as TrueType and Postscript: ${f 1.}$ Cross-platform compatibility (a single file for both PC and Mac offering absolute compatibility between the two platforms) 2. Multilingual support (multiple language character sets can be accessed from the same font). This is particularly useful to advertising agencies, publishing houses, multinational corporations and every other company small or large with accounts and products with an international flair. Most Parachute fonts come complete with a full range of characters to support all European languages 3. Advanced layout features (an exciting function which provides access to advanced typographic features such as small caps, ligatures, oldstyle figures, swashes, etc). They enable the discriminating designer to set text professionally and add a touch of class to the page. Parachute open $Type\ fonts$ with advanced layout features and multilingual support are distinguished from the other "simple" openType fonts by the word "Pro" which is part of the font name. The advanced layout features cannot be accessed unless they are supported by your programs. Currently (early 2007), only InDesignCS, IllustratorCS, PhotoshopCS and QuarkXpress7 support these advanced features.

THE DESIGN OF PARACHUTE FONTS. Parachute fonts are designed by indivinduals who are familiar with Latin, Greek and Cyrillic. These are designers who have studied the particulars of each and every script in order to provide sophisticated, well-balanced, properly kerned and professionally designed typefaces in all different languages. Parachute online fonts are offered exclusively in OpenType format and they are released only after they have been thoroughly tested and reviewed.

How to type **Multilingual** text

It's never been easier to type or edit multilingual text. All you need is: 1. a program which supports opentype fonts (see below), 2. switch your keyboard to the languages you are interested in and 3. use opentype fonts which support the specific languages (Parachute fonts support all European languages). Please note that if you only need to edit an existing multilingual text i.e. copy/paste or change fonts, you don't have to add or switch keyboards.

HOW TO SWITCH KEYBOARDS. First you add the new languages to the system. The steps are similar on both platforms 1. On the PC (Windows XP) you go to the <control panel> section and choose < regional and languages options>. Select < languages> and follow the instructions to add the new languages (for earlier versions please refer to their manuals). Once added, you can switch between keyboards through the language bar that appears on the desktop or through a key sequence 2. On the Mac (MacOsX) you go to <system preferences> and select <international>. Then you choose <input menu> and checkmark the languages you want to add. Once added, you can switch between keyboards through the language palette which appears on the desktop's menu bar or through a key sequence. Please visit Parachute's web site or click on the following link 📞 to go directly to the <international keyboard layouts> support page. View them on screen or download for your reference.

ABOUT GREEK POLYTONIC. Add Greek Polytonic to the system by following above instructions. Once added, you need to know the key combinations for typing your text. Please visit Parachute's web site or click on the following link 🕻 to go directly to the <how to type Greek Polytonic support page>. View the typing instructions on screen or download

MAJOR PROGRAMS THAT SUPPORT OPENTYPE. Currently (early 2007), the programs known to support OpenType are: InDesignCS, IllustratorCS, PhotoshopCS, Microsoft Office, CorelDraw and QuarkXpress 7.

SYSTEM REQUIREMENTS. Windows 2000 or later, MacOsX or later.

fontcredits

COSMONUT PRO. Spaced out and a bit nutty. This typeface revisits the futuristic atmosphere of the 50's and 60's cartoons and is complemented with an amazing, wacky and super cool series of 50 pictograms, designed by the master designer Dimitris Foussekis. This is a very popular informal typeface which was expanded recently into a 'Pro' version that includes Latin, Greek and Cyrillic.

PANOS VASSILIOU. Panos Vassiliou has conducted numerous seminars for leading Canadian companies and institutions such as Bank of Nova Scotia, Royal Bank and Sony Canada. He has organized and promoted several educational and cultural conferences. Two years after his graduation from the University of Toronto/Canada, where he studied Applied Science and Engineering, he pursued a teaching career at George Brown College/ Toronto, first in the Information Systems Department and later in the Media & Graphic Arts Department. He has been Creative Director for the Canadian design firm AdHaus, former Publisher of the monthly magazine DNA (Greece) and Secretary-General for the Hellenic Canadian Congress (Ontario, Canada). He has been designing typefaces since 1993, including commercial fonts as well as commissions from Vodafone, Nestlé, Ikea and **National Geographic.** He is regularly invited as a guest speaker to conferences and seminars, to speak on typography and related topics. After moving to Greece, he started Parachute in 1999 setting the base for a typeface library that reflected the works of some of the best contemporary Greek designers, as well as creatives around the world obsessed with type. Some of his favorite designs include Agora Pro, Square Sans Pro, Fuel Pro, **Champion Script Pro.** He received a design award for his typeface **Archive** at the EBFE AWARDS 2004. As early as spring 2004 he released **Archive Pro**, his first opentype font with special typographic features and multilingual support for all European languages including Greek and Cyrillic. DIMITRIS FOUSSEKIS. He is considered one of the most talented contemporary Greek illustrators. Among his influences are Edmund Guy and Philip Burke. He studied Geology and Paleontology, while he worked as a specialist designer for archeological findings. His designs appear weekly in magazines and often in advertising campaigns. He has designed MyWay and ManicAttack as well as part of DaVinci Script for Parachute, with the most recent being Wonderland.

> NOTE_1: The full character set applies to all styles/weights. Some weights, such as italics may contain more characters. You may view the full character set for each and every font weight by visiting our site at www.parachute.gr NOTE 2: Most floating accents are not shown to save up space. **NOTE_3:** The characters 'various symbols' are shown as a low-resolution image (zooming is limited).

supportedOTfeatures

 $\textbf{1. ORNAMENTS/VARIOUS SYMBOLS:} \ \ \text{This feature may replace the bullet or other characters with}$ any of the available pictograms. All of them are best accessed from the program's 'Glyphs Palette' when available. There is a total of 50 cosmo pictograms included with this font (see a full list on page 10)

3. ORDINALS: Replaces the sequence 'No' with the numero character (No).

No ► Nº

4. SLASHED ZERO: Replaces the regular form of zero with an alternate form which includes a slash through the counter. This is particularly useful when capitals are mixed with numbers in which case capital O may be difficult to distinguish from zero O.
