DOOTYPE.COM

sica *family*

condensed | normal | expanded

*Square humanistic typeface family
for use in text and display, print & screen,
with legibility and versatility.*

designed by: **Volnei Matté** & **Eduilson Coan** – © 2015

the **project**

THE **SICA FAMILY** WAS DESIGNED in order to address issues related to technology, while maintaining humanistic forms. Thus, a font with square shapes emerged, but with smooth curves and slightly rounded terminals making it friendly. *The family has three widths – condensed, normal and expanded – each of them with six weights and their respective italics, resulting in 36 fonts.* With particular details and open shapes that increase legibility, it can be used for both text compositions as well for display sizes. It has 774 glyphs, covering more than 50 languages, as well as ligatures, lining, oldstyle, tabular and proportional figures, fractions, superiors, inferiors, and small caps, all of them accessible through OpenType features.

Technology is the collection of tools, modifications, arrangements and processes that humans use to control and adapt to their natural environment. Engineering is the discipline of designing new technologies. Technology affects human as well as other animals. The human species' use of technology is the conversion of natural resources into artificial resources. Prehistoric discovery of how to control fire is an early example of technology.

A Shifting Reef

48/48

24/27 THE YEAR 1866 WAS MARKED by a strange event, an unexplained and inexplicable occurrence that doubtless no one has yet forgotten. Without mentioning the rumours which agitated the denizens of the ports and whipped up the public's imagination on every continent, seafaring men felt particularly disturbed. The merchants, shipowners, sea-captains, skippers, and master-mariners of Europe and America, the naval officers of every country, and eventually the various national governments on both continents – all became extremely worried about this matter.

ABOUT THE DESIGNERS

Volnei Antonio Matté is a teacher, graphic and type designer in Santa Maria, RS, Brazil. His work and research focuses on typography, calligraphy, editorial and its applications in printing and digital devices. Teaches Typography, Calligraphy and Editorial Design at the Universidade Federal de Santa Maria.

Eduilson Wessler Coan works as a fulltime type designer since 2012. Over the past few years he has developed some incredible retail and custom projects in Brazil as: Encorpada Pro, Bommer Slab, Ninfa, Unimed type system and Veja Serif.

ABOUT DOOTYPE

d.

dooType is a Brazilian type foundry established by Eduilson Wessler Coan in 2008. Our work spans both retail and bespoke projects and our goal is to design contemporary typefaces with unique features of the highest quality.

Curitiba, Paraná, Brazil
