no mere AFTERTHOUGHT

THERE IS NO BICAMERAL PARITY™.

IT HAS BEEN DESIGNED FROM SCRATCH TO
BE AN EXCEPTIONAL UNICASE TYPEFACE,
UNCOMPROMISED BY THE PRIORITIES OF
MIXED CASE OR ALL CAP SETTING.

EACH GLYPH IS SHAPED, PROPORTIONED
AND DETAILED FOR ONE PURPOSE ONLY—
TO OPTIMIZE TEXT SET IN THE LINING
UNICASE FORMAT.

IN THE GARALDE STYLE

aemnuy

MINUSCULE FORMS

BDFGHIJKLPQRT

MAJUSCULE FORMS

COSVWXZ

COMMON FORMS

IT WAS FELT THAT THE OLD STYLE (GARALDE), ADMITTING OF MORE FLEXIBILITY IN LETTER SHAPE AND PROPORTION THAN THE MODERN, WAS THE MOST SUITABLE BASIS FOR PARITY.

FURTHERMORE, THE CONSISTENCY OF WEDGE-SHAPED TERMINALS BETWEEN MAJUSCULE AND MINUSCULE FORMS ENGENDERS A STRONG ELEMENT OF HARMONY. THIS SUBSUMES 'a' AND 'c' INTO THE WHOLE IN A MANNER NOT POSSIBLE WITH THE INHERENTLY LOWER-CASE BALL TERMINALS OF THE CONVENTIONAL DIDONE UNICASE.

unicase/ small unicast

UPPER & LOWER (MIXED) case

PaRiTY

UPPER case AT LOWER case HEIGHT

HOW DOES ONE IMPLEMENT UNICASE AS THE MAIN
STYLE IN THE STANDARD, TWO-CASE FONT FORMAT?

In PaRiTY, UPPER AND LOWER case LETTERS ARE THE SAME,
BUT OPTICALLY SCALED AT DIFFERENT SIZES. TO ALL INTENTS
AND PURPOSES THE EFFECT IS ‘Unicast WITH Small Unicast’—
CHOOSE EITHER, OR MIX.

FITTING | SPACING

TRACKING: DESPITE THE LAYOUT CONSTRAINT OF UNICASE—THE ABSENCE OF PLAY BETWEEN ALL-CAP AND MIXED-CASE SETTINGS—IN ONE RESPECT, TRACKING, PARITY OFFERS SIGNIFICANT OPPORTUNITY. SET TIGHT, PARITY’S FIT IS SWEET, DUE TO THE MANY OLD-STYLE FORMS, WHILE LETTERSPACING HAS THE DIGNITY OF ALL-CAPS, DUE TO LINING HEIGHT.

I/JQY © @ € 71

UNIFORM HEIGHT: WITH ITS LACK OF EXTENDERS, AND GLYPHS WHICH ARE LINING (‘CAP’) HEIGHT, PARITY ENABLES A DISCIPLINED, HIGHLY STRUCTURED KIND OF PAGE LAYOUT.

ABOUT

PANOPTICA
REGULAR,
2003

In the early years of the century, the Type Club of Toronto would meet at the venerable Arts & Letters Club Building on Elm Street, and thence repair to the Wolf & Firkin across the road.

It was through the Type Club that I made the acquaintance of David Scadding, typographer, designer, and professor at York University. In 2002 he recruited Sandra Gabriele, Darren Wilson, Zab Hobart and myself, and asked us to plan and teach a one-semester course in which B.Des students would design a typeface, along with a spot color poster and a 15-second animation that used the font.

This was a rather clever way of getting under the skin of

typography by giving context to the type design process, while taking care of several educational loose ends—and also rather a lot to squeeze into 6 hours of class a week, in a 14-week term!

However, it occurred to me that the workload of glyph drawing might be eased if the typeface were unicasé—and I was delighted by the many unicasé configurations that students devised. So began my love affair with the genre.

Not long afterwards, Stan Bevington, another member of the Type Club, gave me a copy of a book which his press, Coach House, had recently published, ‘eunoia’, by Christian Bök.

I was intrigued by the title, containing all five vowels in a mere six-letter word, and promptly appropriated it for the name of a typeface. This was duly noted by Mr. Bök, who then asked me to recommend a monowidth font for a volume of his constraints-based verse, ‘Diamonds’.

Now it seemed to me that conventional monowidth fonts, with their milieu of offices and typewriters, were inappropriate for poetry, and that a new typeface, marrying the principle of unicasé to that of monospace, would have to be invented;

PANOPTICA SCRIPT
PANOPTICA SANS
PANOPTICA SANS MEDIUM
PANOPTICA SANS BOLD

hence Panoptica, in 2003.

One advocate of Panoptica, Breck Campbell, used it in a TV title sequence. Deciding that it needed some kerning, he asked if I had a proportional version. Of course not, I huffed, that would defeat the whole point of the exercise; but the seed had been sown.

Shinntype has been upgrading its back catalogue to OpenType since 2006. However, there are still a few fonts to go. In early 2011 I started on Panoptica, but soon became distracted by another idea: that I should take a break from producing large multi-purpose families, to concentrate on a series of experimental fonts, mainly for display. Checker was the first of these, and this Panoptica ‘upgrade’, Parity, the second.

—NICK SHINN, ORANGEVILLE, 2011

Sweet Pea Brand: Display settings of Panoptica, dispensing with monospace.
